## Death of Mrs. Dufreit.

Merrill Star.—Mrs. Emanuel Dufreit passed away at her home last Wednesday morning, peacefully passing the border line to be reunited with her husband who went before but a few months since. Mrs. Dufreit had been in ill health for a year or more, and during the past several weeks had been confined to her bed, and a number of times her friends thought the beckoning hand was visible, but she rallied and seemed to be improving until the final dissolution.

Sophia Louisa Mennett was her maiden name, and she was born in Switzerland, Oct. 24th, 1829, and came to America 1850, settling in Illinois, where in 1851 she was married to Emanuel Dufreit. In 1856 they moved to Centralia, and in 1881 came to Merrill where they resided until called to that better home. She is survived by two adopted daughters, Mrs. Anna Lemley of Milwaukee, and Mrs. T. C. Hanson of Phoenix, Arizona; also one sister, Mrs. Carolina Rossier of Grand Rapids, and two brothers, E. Mennett of Montana, and Adolph Mennett of New Mexico.

The funeral services were held this morning at the Church of the Ascension, Rev. Raker conducting the services; the same being attended by a large gathering of friends who desired to testify by their personal presence to the esteem for the departed. The floral tributes were indeed profuse and beautiful, and she in whose honor they were gathered, was well worthy of them all.

## Wagner-Von Bergen.

Joseph Wagner of Toledo, Ohio, and Ruth Von Bergen of the town of Grand Rapids, were married at the Congregational parsonage last Saturday evening. They left on Monday morning for Chicago where they will make their future home.

The bride is the niece of Thos. Maat who has been a resident of Grand Rapids for the past six months. The groom is a mechanical engineer at present employed in Chicago.

The pickle crop in this section has been short, not more than half what it should have been. The dry weather coming just when it did stopped the growth of cucumbers on the sandy land and what there were picked later on were of very poor quality.

## State of Wisconsin, County of Wood,

In Circuit Court.

In the matter of the application of the City of Grand Rapids for the condemnation of lands for the widening of the street in said city known as Vine Street.

Whereas, a judgment has been duly rendered and entered in the Circuit court of said county condemning a strip of land twenty feet in width off the Northeast side of Lots numbered one (1) and eight (8), Block number thirteen (13) Neeve's Addition to the city of Grand Rapids, for the purpose of widening Vine street in said city of Grand Rapids, and

Whereas, the Common Council of said city of Grand Rapids did on February 11, A. D. 1908, by resolution duly adopted, duly ordain: First,—That the Board of Public Works of said City be directed to make an assessment of Damages by reason of such condemnation. Second,—That said Board of Public Works be further directed to make an assessment of benefits by reason of such condemnation, now therefore

Notice is hereby given that said Board of Public Works have this day made and filed in their office in said city of Grand Rapids, (which said office is in the office of the City Clerk of said city of Grand Rapids,) their report of the assessments of benefits and damages to property owners in said city of Grand Rapids, on account of the widening of said Vine street pursuant to law and said resolution adopted on February 11, A. D. 1908, and that said report is now on file in the said office of the said Board of Public Works, for public inspection and review, and said report will so continue to be on file in said office for a period of ten days from the date hereof for public inspection and review. Said board will be in session at their said office, on the 24th day of September, A. D. 1908, to hear all objections that may be made to said report.

Dated this 12th day of September, A. D. 1908. Frank Pomainville, Frank L. Steib, G. M. Hill, F. H. Jackson, E. W. Ellis. Board of Public Works of the city of Grand Rapids.

## Love-Bousha.

Mosten Times.—One of the prettiest church weddings ever held in this city took place at St. Paul's Catholic church Wednesday morning when Miss Alice Bousha, of this city, and Mr. Paul Carlton Love, of Kansas City, were married. Rev. Father Laurer officiating. The bride was attended by the Misses Alice O'Connor, of Oconomowoc, and Louise Desert, of this city. The groom was attended by Mr. John Bousha, brother of the bride, and Roger Guenther of Kaukauna.

The bride was attired in a beautiful princess gown of white Mousseline silk, with insertings of Pilet lace and carried a shower bouquet of brides roses. Miss O'Connor wore a white lace princess over pink silk. Miss Desert wore white crepe de chene. They wore large picture hats and each carried a bouquet of brides roses.

The groom is the youngest son of Mr. and Mrs. Thos. Love, of Grand Rapids. He is a young man of sterling qualities, a graduate of the Grand Rapids High School and the University at Madison, and at present holds the important position of salesman for the Graham-Paier Co. at Kansas City.

The happy couple were the recipients of many beautiful gifts in cut glass, china and silverware. They then left the same evening on a wedding tour to Chicago, Sioux City, St. Louis and will be at home at Kansas City, Mo., after October 15th.

Those present from away were Mr. and Mrs. Thos. Love and daughter May, of Grand Rapids; Ray Love of Milwaukee; Mrs. E. Nason and daughter, Rhineland, B. P. Bowman, wife and daughters, Alice and Dorothy, Abbottsford, Mrs. J. O'Connor and daughter Alice, Omea, Mrs. P. Collins and daughters Anna and Clara, Stevens Point, Mrs. G. G. Knoll and daughter Evelyn, of Daney, Clara Cooper, of Moon, and Roger Guenther, of Kaukauna.

## In Danger of Fire.

The fire that has been burning north of the city on the east side of the river got so close to Byron on Monday as to cause considerable uneasiness and the Paper Company at that point got out their hose and wet down the surrounding property. The company has a large quantity of wood stacked there and if the fire once got started in it the chances are that it would cause a large amount of damage not only to the mill property but also to the houses in that neighborhood. The mill, however, is well provided with pumps and fire apparatus.

Some of the club houses on river have also been in danger of burning and the owners have been making trips there and doing what they could to stop the progress of the flames. Had there been a heavy wind from the southwest at any time during the past few days there is no question but what most of the property along the river bank would have been wiped out of existence.

Fire has been burning on the Egge marsh for several days past but outside of the burning off of the top of the ground but little damage has been done.

## For Sale.

Notice is hereby given that the Grand Rapids Improvement Association has purchased the LaMadine and Wheeler properties on First Avenue for park purposes and proposes to sell the buildings located thereon to the highest bidder. Sealed bids for said buildings will be received by said Association up to and including September 16, 1908. Possession of the buildings will be given not later than October 15, 1908, and must be removed within fifteen (15) days from acceptance of bid and possession. Address bids to the undersigned Secretary.

Grand Rapids Improvement Ass'n. By Theo. W. Brazzosa, Secretary.

## For Music Lovers.

Mrs. Charlotte Lynn-Campbell will give a concert at the Lincoln high school on this (Wednesday) evening, and all lovers of good music should make it a point to be present. Mrs. Campbell is a vocalist of unusual ability and wherever she has appeared has received the unstinted praise of all who heard her. There is no doubt but what she will be greeted by a full house this evening and those intending to go may feel assured that they will be well paid for their trouble.

## Second Moravian Church.

Because of an invitation to assist in a series of special services in Winston-Salem, N. C., the pastor will not return before Oct. 8th. On Oct. 4th service will be held in Scandinavian at 7:30 a. m. by Rev. O. Madsen. Preaching in Scandinavian in the afternoon at 3 o'clock.

Further notices will be published in due season. Provincial Synod is now being held at Elitz, Pa., and will probably close Sept. 17.

## Shut up for One Year.

Mike Duke, the young fellow from Nekoma, who was in the county jail awaiting trial at the coming term of circuit court on a grand larceny charge, went before Judge Webb on Thursday and plead guilty and was given a sentence of one year. Duke is the same man that was arrested at the time of the Kelloway Lumber Co's fire at Nekoma, but at which time no evidence was discovered to show that he was connected with the matter in any way.

## Petit Jurors.

The jury commissioners, Messrs. P. A. Christensen of Marshfield, C. A. Lindberg of Pittsville and Archie McMillan of this city, met at the court house on Tuesday and drew the jurors for the coming term of court which convenes in this city on Monday, Oct. 5th. Following is the list of jurors.

Wm. Thimke St., Apple Town; Benj. Darnas, Auburndale Town; Jattus E. Slater, Cary Town; John McCauley, Grand Rapids City; Matt Schille, Grand Rapids City; E. C. Lowell, Hansen Town; Edwin K. Hovee, Lincoln Town; Herman Hovee, Marshfield City; Arnold Hovee, Marshfield City; Wm. E. Eschbach, Marshfield City; Andrew Kolth, Marshfield City; Wm. L. Little, Marshfield City; Fred J. Lundin, Marshfield City; E. A. Upham, Marshfield City; August Drager, Marshfield Town; C. W. Everts, Milladore Town; Jos. E. Lutzmeyer, Milladore Town; Peter Meyer, Milladore Town; Neil Crown, Nekoma Village; Carl Rhoads, Nekoma Village; Joseph Short, Nekoma Village; Emil Garrison, Port Edwards Town; Wm. Schaufitz, Port Edwards Town; John Robinson, Remondtown Town; Wm. Krause, Remondtown Town; Wm. Trachte, Remondtown Town; Hans H. Paulson, Rock Town; Thos. Christ Peterson, Rock Town; Nels Larson, Rock Town; Otto J. Lou, Smeets Town; Chas. G. Becklund, Sigel Town; B. W. Gates, Sherry Town; Wm. Haurlickson, Wood Town; Milo H. Lowell, Wood Town.

## ADVERTISED LETTERS

Wacha, Gust (card); Walters, Perry (card); Witte, Paul; Witto, John; Yellor, Wm.

J. R. Ragan, president of the Wisconsin Undertakers Association, left on Saturday for Eau Claire where he will open the school of embalming which is conducted by the Wisconsin association during the next two weeks. The association will have an lecturer and demonstrator, First, H. S. Eckels, of the Pennsylvania school of embalming, and it is expected that there will be about 100 students in attendance. The annual convention of undertakers will be held at Eau Claire on Sept. 23 and 24 and Oct. 1. Mr. Ragan will also stop at Chippewa Falls for a few days where he will attend the Chippewa county fair and homecoming that is being held there.

The weather this year seems to be conspiring to put Hicks, the weather man out of business. He used to guess at the weather and whenever he happened to strike it he made a lot of new converts and confirmed a whole lot who had been converted some time before. According to Hicks we were going to have all kinds of weather during August, but we didn't. Then there have been a couple of storms predicted for September so far, but neither of them have happened, and it doesn't take much of a sense to state that Hicks is on the humor so far as weather predictions are concerned.

Last Sunday afternoon the weather bureau at Washington issued the following special forecast: "The first well defined disturbance of the present season is approaching the north Pacific coast and a West Indian storm is advancing toward our southeastern coast. This combination should produce abundant rains in the drought stricken district of the north central states before the close of the present week."

Nason and Demore have about closed a deal with Ben Hansen for a piece of property lying in the rear of the Chambers livery stable on which they expect to erect a shop. They will probably not put their building out of concrete blocks and build it two stories high with a basement and have it close enough to the railroad track so that they can ship material and manufactured products out with facility.

Supt. Pfeiffer reports that the dry weather is seriously affecting the wells that supply the city with water and that there has been barely enough to furnish the public for some time past. So far it has not been necessary to pump river water into the mains but it has been a pretty close shave much of the time.

Remember that the band concert starts at 7:30 hereafter instead of 8 o'clock as heretofore. The change is made because it gets dark so much earlier now and it allows everybody to get home earlier.

## Low License Carries.

The vote on the license question in this city yesterday resulted in a majority voting for low license, and as there was a great majority of the voters out, it may be considered a fairly good representation of what the people want. Following is the vote in detail.

	\$300	\$200
First Ward	20	67
Second Ward	28	69
Third Ward	84	44
Fourth Ward	49	89
Fifth Ward	38	107
Sixth Ward	70	85
Seventh Ward	61	62
Eighth Ward	72	48
Totals	420	601

Total vote cast 981. Majority for low license 141. There were a number of ballots thrown out on account of being defective either by not being marked at all, or in some other way, but not enough to affect the general result in any way.

## Library Notes.

Circulation of books for month of August shows an increase of 714 over the circulation for same month in 1907. Circulation by classes is as follows:

Philosophy	3
Religion	2
Sociology	16
Natural Science	19
Useful arts	16
Fine arts	10
Literature	26
History	20
Travel	3
Biography	1270
Piction	17
German	17
Reading collection	67
Periodicals	1684
Total	

## Prevented the Election.

An injunction was served on the authorities at Stevens Point on Monday to prevent them from holding the special election that was to have been held on Tuesday to vote on the license question. Both those in favor of high license and those against it were in favor of stopping the proceeding, as the proper legal formalities had not been attended to and if the election were held it would not be lawful and would be a needless expense. By stopping the proceeding as they did the liability of litigation over the matter was done away with. The injunction was granted by Judge Webb of this city.

## Conrad Winfred Peckham Dead.

Conrad Winfred Peckham, son of S. E. Peckham, died at his home in the town of Grand Rapids on Friday after a short illness with appendicitis. Deceased was born in Bloom City, July 9th, 1862, and moved here with his parents a little over a year ago, who settled on a farm owing to their son's poor health, the father being a retired Methodist minister. The funeral occurred from the home on Sunday, Rev. Evans of the M. E. Church, preaching the funeral sermon.

## Will Locate at Nekoma.

Dr. George Pomainville, who has been practicing medicine at Watunau, Ind. for some time past, has been in the city the past few days visiting his relatives here. The doctor reports that he has decided to locate at Nekoma and has secured offices in the Williams building in that city. His many friends here will wish him success in his new location.

## Port Edwards Beats Jola.

The Jola ball team was shut out at Port Edwards on Sunday by a score of 6 to 0. The game was a good one all the way thru and was witnessed by a large and enthusiastic audience. Chas. Nash of this city was in the box for Port Edwards and Bourgard of Port Edwards caught.

## Death of Sarah Hanneman.

Mr. and Mrs. Hanneman of Kelloway are mourning the loss of their little daughter, Sarah, which occurred on Monday morning after a short illness. They have the sympathy of the community in their affliction.

Joseph Bergeron of Port Edwards arrived in the city on Tuesday from a four weeks visit with relatives in Canada. Louis Lyons and son Frank of Rudolph are expected to arrive home on Sunday.

Fred Wittenburg returned home on Monday night, having been away receiving treatment during the past five weeks for sciatic rheumatism. He reports that he is much better than when he left, and hopes to entirely recover in time, a fact which his many friends will be pleased to note.

John Glen, son of Mr. and Mrs. H. J. Glen, enlisted in the United States Navy last week while in Milwaukee, and the next day left for San Francisco where he will be stationed at present. John has many friends in this city who will wish him success while in Uncle Sam's employ.

"The Imperfections of the Perfect" will be the subject of the sermon at the morning service in the Congregational church next Sunday. Bible school at the close of the morning service. Young people's meeting at 7:30.

# From the State Capital

Items of Importance to Wisconsin People, Gleaned at Madison.

Madison.—Wisconsin's high standard of sanitary cleanliness is the reason given by Health Commissioner G. A. Harding for losing the next convention of the American Public Health association.

Dr. Harding returned tired and tanned after three days' chicken shooting in South Dakota. He left Winnipeg in a half hour which was without equal in the history of Manitoba. The storm broke car windows, shattered show windows in all the hotels and caused havoc with the crops.

At Wisconsin had not attained such a high degree of sanitary excellence I might have landed the convention for 1920," said Dr. Harding. "As it was I think I can safely promise that Milwaukee will entertain the association in 1919. The advisory board decided upon Milwaukee as the next meeting place for the association and all the Wisconsin papers printed front page articles describing our campaign and the city of Milwaukee. The day after that we sat on the floor of the convention. The delegates who opposed Milwaukee said their chief objection was that Wisconsin had conquered so many sanitary problems that there were practically no field for actual work and observation in this state."

**Abbott is Nominated.**  
James K. Abbott of Madison is nominated for insurance commissioner on the Republican ticket by less than 400 votes. The figures for Forest county could not be obtained accurately, but, excluding that county, Abbott had 5,089 in the 36 counties which he carried. He carried 21 counties with a majority aggregating 4,834. This gives Abbott a lead of 393. Forest county is not the former home of Mr. Abbott and he probably carried it by a small margin. The largest majority vote given Abbott was in Milwaukee county, with 768, and the smallest majority vote given him in any county was in Oneida county. He carried a majority of 982 in Waupaca county, his home, and the smallest majority vote of any county was 1 in Lincoln county. The returns indicate that the contest was sharp in all counties, and in 28 the majorities given are less than 100.

**New Faces in Legislature.**  
There will be many new faces in the legislature this year. Some of the men who have been elected to the state house for four and eight years will not return. Senator Henry Hagedorn of Green Bay, who was first elected in 1900, declined to be a candidate for re-election and the Republicans have chosen Timothy Burke, the tallest man in the assembly last year. Theodore C. Froemming was turned down in the fourth senatorial district in Milwaukee. H. W. Botsch, securing the Republican nomination. Froemming's friends believed there was no sentiment against him and did little work in his behalf. The Sixth district has been represented by Jacob Kimmel, a Social Democrat, for the past four years. This year he is a candidate for United States senator and W. R. Gaylord was nominated by the Socialists and A. J. Langhoff by the Republicans. Practically 60 per cent. of the members of the assembly every session are new members. There are a few, however, who succeed in lasting several sessions.

**Rise in Realty Values.**  
Appraisers appointed by the court to fix the value of the Cornelius lot on State street, which the board of public revenues wants to buy, appraised it at \$20,000, which is \$4,500 more than was recently paid for it for the purpose of erecting a banquette building on it. The lot adjoins the Porter household, which the university recently bought two years ago for \$20,000 and has since converted into an administration building. The appraisement sets a new mark for real estate values in the vicinity of the university.

**Rose at Firemen's Festival.**  
"Democratic day" of the three days' full festival of the local fire department at Firemen's park drew a large crowd to Waterloo. Mayor Joseph of Milwaukee and delegation of about forty members of the Associated Rose clubs attended. Mr. Rose discussed the principles of the Democratic party. He made a plea for Bryan and Kern and the Democratic state and congressional tickets as well as for the county ticket nominated at the preliminary "Rough Riders" had for speakers Charles A. A. McGee of Milwaukee and Congressman Nelson.

**Put on Lid at State Fair.**  
There will be no wheels of fortune, shell games or attractive contrivances calculated to win the public attention at the state fair. Sheriff W. R. Knell of Milwaukee county made this announcement and informed a number of prospective concessionaires that any attempt to open games will be met with arrest and prosecution. Sheriff Knell also announced that the state fair law relative to the sale of liquor on the grounds and the operation of "littered pigs" will also be enforced.

**Davidson Saves Two from Lake.**  
Gov. Davidson went fishing on Lake Mendota in a small boat and incidentally rescued two men from death by drowning. As the governor was casting his line for a strike he noticed some distance away an upturned canoe with two men clinging to its side. Without pulling in his line the governor took the oars and, by strong rowing against the high wind finally reached the two unfortunate. He pulled one of the men into his own boat and then brought the other to safety.

**Stuck to His Papers.**  
Green Bay—James Moran, a newspaper 12 years of age, walked off of the east approach of Walnut street bridge with a bundle of papers tucked under his arm. Sank below the surface, came up, was pulled out of the water by another young man and still held the papers in a firm grip.

**Washburn Menaced.**  
Washburn.—A dangerous fire threatened Washburn, starting in "Shanty town," near the lumber yards.

**Washburn Menaced.**  
Washburn.—A dangerous fire threatened Washburn, starting in "Shanty town," near the lumber yards.

## NOTES FROM MEADOWBROOK FARM

By William Pitt

The horse needs salt as well as the other animals.

You cannot afford to overlook the facility question.

Never water a horse when he is hot and tired and then let stand.

A change of diet is a horse's need sometimes when he is off his feed.

Wide tires have an important bearing upon the question of good roads.

From 81 to 83 per cent. of the corn crop of the United States is fed to livestock.

The feet of the road horse will be sounder if dipped in a pail of water every day.

Wash the harness thoroughly with a good harness soap and, after drying, oil thoroughly.

Systematic and intelligent management is required to get eggs the year round from the flock.

Don't crowd the training of the colt. Be sure he has mastered one thing before starting on another.

It is said that the temperature of countries with sandy soils is higher than those whose soils are of a clayey character.

Scours in young animals can often be checked by wheat flour, scorched and mixed with skim milk and the yolk of an egg.

Sow the spare field to rye. Sows can it will make good growth before cold weather and completely cover the ground for winter.

Form the acquaintance of your colts early, and keep their confidence by little bits and an occasional petting. Begin the training early.

Leaves of clover hay constitute its most nutritious part and for this reason it should be fed in light rations, so that none of it will be lost.

Slage is valuable as a maintenance feed for the winter, whether the animals are to be slaughtered immediately or carried over for summer grazing.

Give the work horses a few days off in the fields occasionally. They will do much more work when put to it again than they would without, the rest.

The best horse for the farmer is not the fast roadster, but the fast-walking draft horse. In training colts always put them with the fastest walking horse you have.

Four things must be reckoned with in estimating the value of an animal dip, namely, efficiency to destroy parasites, non-irritating effects, ease of preparation and cost.

Inspect and repair the harness at frequent intervals. It will prove the truth of the old adage that "a stitch in time saves nine." Nay, more, it may save a serious accident.

You and wife need a vacation. Take it by going to the state fair. It will rest and refresh the body and put new ideas into your head, plus the energy needed to carry them out.

Why raise weeds when the garden patch will grow the crops. After the early vegetables are out of the way always plan to put in something else that will do well in the late fall.

The stock need salt. Don't trust your memory to feed it to them at intervals. Have it in a receptacle to which they will have access at all times. They will only eat what is good for them.

The tuberculin test as now used is considered by some of the more conservative agricultural experts as little better than guesswork, and that as a result thousands of perfectly healthy cows are and have been sacrificed needlessly.

Look at the horse carefully before buying. Watch him standing as well as in motion. If sound he will stand firmly and squarely on his limbs without moving, except when he has very high life. He will be flat on the ground with legs plump and naturally set. If one foot is thrown forward, it is a sign of lameness. The ground with hoofs raised, or if foot is lifted disease of the navicular bone may be suspected, or at least a tenderness which is liable to develop into serious disease. If the foot is thrown out, toe raised and heel brought down, the horse has suffered from laminitis, founder, or the back sheaves are sprained; he will be nervous. If feet are drawn to the center, beneath the horse, it indicates a displacement of limb and weak disposition of the muscles. If horse stands with feet spread apart, or straddles with his hind legs, there is weakness of the loins and the kidneys are disordered. If knees are bent and tremble, the horse has been ruined by overpulling. You run great risk in buying horses with contracted or badly formed hoofs. It is always safest to have the horse thoroughly examined by a competent veterinary surgeon before closing the deal.

The farmer has no one to blame but himself when his soil becomes impoverished, for both by crop rotation and the raising of livestock he can put more into the soil each year than he takes out.

Tests made by the Minnesota station indicate that pork can be produced with less grain by hogging of the corn than by feeding it in the ear or snapped in the yards. Hogs fed in the field showed a gain of at least one-third more than those fed in the yards.

It is a mean horse, indeed, that does not want to please. For this reason it is safe to conclude that when he does not respond to a command he has been too understanding. Be patient and be sure that the horse knows what you want him to do before punishing him.

Clean out the nest boxes frequently.

Wet the corn before putting in the silo if it is extra dry.

Keep the young chickens growing. Green food is essential.

The vitality of alfalfa is much lessened by letting it stand very long after the proper time for cutting.

It is the cow which the man is anxious to sell that you cannot afford to buy.

Keep only as many chickens as you have room for. Crowding is always disastrous.

Salt, fresh water and kind words go a long way in inducing the cow to fill the milk pail.

Speltz when ground and mixed with bran or cornmeal makes a good feed for milk cows.

Do you know how to run your farm as well as you think you know how to run the country?

The stanchion is a cruel thing to keep the cows in during dry time, unless the stable is screened.

Kerosene makes a good spray to use in the chicken house, only be careful of fire or lighted matches after using.

One does not have to look at the average farm orchard twice to know that it is the most neglected spot on the farm.

Dirt is the great enemy of milk. From the feeding and handling of the cow to the final disposition of the milk you cannot be too careful.

To stop a horse from gnawing, wash the manger and rope with coal tar. This must be put on hot with an old brush or broom.

It should not be necessary to remind you that the separate should be washed and scalded each time it is used. Washing it out with clean cold water is not sufficient.

Eggs that are uniform in size and color find a more ready market and a better price than eggs not so assorted. This is one of the strong arguments in favor of one breed of hens.

The dairy farm needs power of some kind. In purchasing an engine get one that will do more work than you will require of it. It will make its running easier and will provide for increased business.

After the first year it is almost impossible to judge the age of a hen, and for this reason leg bands should be used to prevent you from sending the young hens to market and keeping the old ones. The cost of the leg bands is as nothing compared to the convenience of knowing each individual fowl. Register the numbers in a book and under each number keep a record of the hen bearing that number. In this way you will be able to deal intelligently with your flock and make your profits more.

A wallow for the hogs is a good thing in the summer time for it helps them to keep cool. One of cement may be made by digging a hole 15 inches deep and ten feet square. In the bottom pack six inches of coarse gravel or cinders, and on this lay three inches of coarse concrete. Smooth off the surface and raise the sides six inches higher. This makes a shallow basin, which will make a good sanitary wallow, and a barrel of water a day will be sufficient to keep it going. If you have running water which can be piped into the basin, so much the better.

A method of curing alfalfa hay without the use of hay caps which has proved successful is to cut the alfalfa in the morning as soon as the dew is off, allow it to remain in the swath as late in the afternoon as possible and then get it stacked before the evening dew falls and then put it in tall cocks, if it looks like rain; otherwise leave it in the windrow over night. If the next day is sunshiny the hay is scattered after the dew is off, allowed to dry until late afternoon and put in the hayrack. If the weather is not favorable for drying, more than two days will be required to cure the hay.

Here are some feeding maxims by Prof. Beach which we are glad to give space to among the Meadowbrook Farm Notes: The more food the cow can be induced to eat, the more milk she will produce. Cows do not usually consume more food than they can properly digest. The ration, therefore, should be made as palatable as possible in order to induce the cow to eat large quantities. The larger the amount of protein in the ration, the larger the milk flow. Protein in the ration is essential to the production of the milk. The less energy required to digest the ration the larger the milk flow. The richer the ration, the richer the manure. The dairy farmer must look here for a large part of his profit. No two cows can be fed alike. Each must be studied differently. Increase the protein in the ration and watch the milk flow.

Sanitary milk comes from healthy cows that are kept in a sanitary manner. Thorough cleaning of milk utensils, the cleaning and ventilation of the stables and the proper feeding management to keep the cows in good health must not be neglected. Of course economic feeding must be practiced to make a profit out of the handling of milk-producing animals is so neglected as the actual care of the cow herself. Brushing and washing the parts likely to carry dirt into the milk should be daily practice. The hands and person of the milker should be clean. A pair of clipper should be used to keep the hair of the legs and udder of the cow, to prevent accumulating filth. The handling of the milk from the instant it is drawn from the body of the animal until the time it is delivered to the consumer or made into another product is the third great point to be observed.

The farmer has no one to blame but himself when his soil becomes impoverished, for both by crop rotation and the raising of livestock he can put more into the soil each year than he takes out.

Tests made by the Minnesota station indicate that pork can be produced with less grain by hogging of the corn than by feeding it in the ear or snapped in the yards. Hogs fed in the field showed a gain of at least one-third more than those fed in the yards.

It is a mean horse, indeed, that does not want to please. For this reason it is safe to conclude that when he does not respond to a command he has been too understanding. Be patient and be sure that the horse knows what you want him to do before punishing him.

HOOT HOLY JUMPERS AGAIN. HEARST TO ANSWER \$48 BILL.

Members of Sect Attempt to Make Converts at Waukesha Beach.

Waukesha.—For the first time since the arrival of the sect in this city members of the "Holy Jumpers" invaded Waukesha Beach and attempted to convert the crowd that had assembled to attend a ball game. A large crowd was seen leaping and hooting them. They were ordered off the grounds by the management, but refused to go, claiming it was public property. They were convinced, however, that it was private ground and, after kneeling in the gravel between the street car tracks, where they offered a prayer, they returned to this city.

**DEAF SCHOOL TO OPEN.**  
Attendance of 275 Pupils is Expected at Delavan.

Delavan.—The Wisconsin School for the Deaf will enter upon its fifty-seventh school year on Wednesday, September 19. It is expected that the attendance during 1908-1909 will reach 275 because of the added facilities for the deaf of the state. The new \$50,000 industrial building is now being occupied. In the spring work was begun on a \$40,000 dormitory for

**Wed Secretly at Kenosha.**  
Kenosha.—Imposing the strictest secrecy upon the minister who performed the ceremony and the court of felons who issued the license, Marshall Olds, who gave his occupation as an attorney and his place of residence at Chicago, was married here to Miss Mary A. Butler, a daughter of John A. Butler of Riverside, Cal. The young man declared that he desired to keep the marriage secret because his bride

**Waukesha.**—William Randolph Hearst will come to Milwaukee on September 14 to appear before Justice of the Peace Oscar E. Selwoner to make answer in a civil suit brought against him by William Krehelmer, a saloon-keeper in the town of Granville. The case dates

The conical shape is produced by winding strong sennit cord spirally about the heads of young babies, tightening the coils from time to time. A piece of plated mat is first put over the head and the cord is coiled over this, so as to give it a good purchase. The crown of the head is left to develop in the upward and backward fashion that is so much admired.

"In this cat," he said, "was re-  
nated the soul of the deceased  
Grant, and it should, therefore,  
be treated with the military honors  
to his excellency."

**Few and Far Between.**  
An employe of a matrimonial bureau in Chicago testified on the stand that only ten photographs of men women out of 10,000 are of sufficient merit to attract.

the 1990s, the number of people in the United States who are 65 years of age or older is projected to increase from 20 million to 30 million, and the number of people 75 years of age or older is projected to increase from 10 million to 15 million (U.S. Census Bureau, 1996). The number of people 85 years of age or older is projected to increase from 2 million to 4 million (U.S. Census Bureau, 1996). The number of people 90 years of age or older is projected to increase from 500,000 to 1 million (U.S. Census Bureau, 1996). The number of people 95 years of age or older is projected to increase from 100,000 to 200,000 (U.S. Census Bureau, 1996). The number of people 100 years of age or older is projected to increase from 10,000 to 20,000 (U.S. Census Bureau, 1996).

## LOCAL ITEMS.

Uncle Joe White of Vesper was a business visitor in the city on Saturday.

Dr. Karl Dege of Marshfield was professional visitor in the city on Sunday.

Herman School of Wausau is a guest of his cousin F. F. Schultz for a few weeks.

O. W. Dodge of Port Edwards was in the city on Saturday attending to business matters.

Clay R. Wood, W. J. Conway and A. L. Ridgman made a trip to Laidfield on Sunday.

Bob Mando departed on Monday for farineto where he will visit friends in the coming week.

Mr. and Mrs. Paul Philson of "omahaw visited with relatives in the city the past week.

—Woolens will not shine if washed with Galvanic Soap and cold water according to directions.

Attorney R. E. Andrews of Marshfield transacted some legal business at the court house on Tuesday.

Herman Keston and wife of Wausau spent several days in the city last week at the F. F. Schultz home.

Mr. and Mrs. Ernest Sauer and children spent Sunday at the August Stahl home in the town of Haasau.

Mrs. John Harrison, a former resident of this city, died at her home at Joutney, Minn., Sept. 1st, of cancer.

Mr. and Mrs. E. W. Ellis left last week for the east, expecting to be absent several weeks visiting relatives of interest.

Clarence Jackson left on Monday for Appleton where he will attend Lawrence University during the coming year.

Ernest Roberts, one of the solid farmers of the town of Randolph, was a pleasant caller at this office on Monday.

Mr. and Mrs. Chas. Gurtler and children returned on Saturday from a week's visit with relatives in Milwaukee.

and have it close enough to the railroad track so that they can ship material and manufactured products out with facility.

Mrs. Jane Granger returned on Saturday from Minneapolis where she spent the past eight weeks visiting with her daughter.

Geo. N. Wood and T. E. Mullen spent Sunday at Wausau where they went to take in the ball games between Wausau and Green Bay.

Ray Love, travelling freight agent for the Monon route, was in the city on Monday attending to some business matters and shaking hands with his numerous friends.

Mrs. Charlotte Evan-Campbell will give her concert at the Lincoln high school on Wednesday evening, September 16. Owners of good tickets should not fail to attend.

E. L. Baumgardner of Stoughton, arrived in the city last week to visit his brother-in-law J. T. Schumacher for a time. Should Mr. Baumgardner like the city he may decide to locate here.

Dan Ketchel and Leo Ramsey returned on Sunday from Sturgeon Bay where they had spent a week in making a trip around the peninsula by boat. They report a very pleasant outing.

Rev. Mr. Clark will speak to the Robekals and Oki Fellows Sept. 20 at the Baptist Church, this being the Robekal anniversary. All Robekals are requested to meet at I. O. O. F. Hall at 10 o'clock sharp Sunday morning.

Neal Brown of Wausau, democratic nominee for U. S. Senator, stopped in the city on Thursday while on his way home from the west side and made a short speech from the west side stand to a large crowd that had assembled there to hear him.

The remains of Mrs. Archie Muir of March Rapids, were brought to this city last Wednesday and interred in Forest Hill cemetery, services being held at the Episcopal church by Rev. C. B. Blakeslee. Mrs. Muir was the mother of Mrs. Ed Morrill of this city and was well known here by a number of our people.

During the hot weather and high winds of last week there was some talk of getting out the fire apparatus and waiting down the hillside and streets about town. As it would be necessary to use the fire engine and a long stretch of hose the firemen concluded that it would be better to keep the teams close to the engine house and have everything in readiness in case a fire started anywhere.

L. W. Fronties, who resides about three miles from Valley Junction, was in the city on Monday circulating a petition among our people for the purpose of securing aid. Mr. Fronties lost nearly all of his possessions in the cyclone of July 3, 1907, and received some injuries himself that incapacitated him for some time.

The last of the summer concerts by the band will be given on Tuesday evening of next week, when the members will commence rehearsing for a series of concerts for the coming winter which will be given in the opera house. There will probably be five in the series the same as there was last year, one to be given each month and the boys expect to furnish some good music.

S. H. Smart and Don Smart returned on Thursday from Chicago where they had spent several days looking up apparatus for their moving picture show which they expect to operate in the Blodgett building on the east side in the near future. Opera chairs will be placed in the building and everything possible done to make it pleasant for theater goers.

The people of this city were treated to a sight on Friday that many of the younger generation have never before witnessed. That was a yoke of oxen hitched to a too buggy. The outfit belonged to an Adams county farmer who had come to town to do some trading and take in the sights. An ox team is quite a curiosity nowadays and when they are hitched to a top buggy they are even more unusual.

Mrs. Chas. Carborz and children spent Sunday with relatives in Neokoma.

Mrs. Richard Evans is visiting with her parents at Hortonville this week.

Raymond McManley of Merrill has entered the Grand Rapids Business College.

Ray Starr left on Monday for Chicago where he has accepted a position.

Mrs. M. Palmator and family are closely settled at 1018 W. Dayton St., Madison, Wis.

F. S. Gill has been laid up the past month with a severe attack of rheumatism.

Mrs. Albert Gilmeister visited with relatives in the town of Sizel several days last week.

Miss Minnie Lucht left last week for Baraboo where she is visiting with relatives.

Miss Lydia Stanz of Merrill is a guest of her sister, Mrs. E. W. Ellis, for several weeks.

Miss Mollie Muir of March Rapids is a guest at the home of Mr. and Mrs. J. J. Morrill.

Mr. J. J. Umanetz and W. O. McGowan, took in the ball games at Wausau on Sunday.

Mrs. J. N. Mosler and son of Tomahawk have been guests of Mr. and Mrs. C. A. Philson the past week.

Mrs. E. F. Fahl left on Saturday for Stratford where she will visit for a short time with a sister of Mr. Fahl's.

Mrs. E. T. Harmon departed for her home in Milwaukee on Thursday after spending a week with relatives in this city.

Harry Wagner will commence the erection of a residence on the property on First street recently purchased by him.

D. McVicar, the Vesper lumberman transacted business in the city on Friday. This office acknowledges a pleasant call.

—Remember H. W. Backus' Cough Remedy cures that awful cough and sore throat. Nothing else does it. All druggists.

Mrs. Jerro Doughty of Randolph was a pleasant caller at this office on Saturday while in the city doing some shopping.

Mr. and Mrs. L. M. Mathis are rejoicing over the safe arrival of a baby girl at their home, which event occurred on Saturday.

Miss Oona C. Winslow of Stevens Point arrived in the city last week to attend the Wood county training school for the coming year.

F. J. Hanna of Colorado Springs will give a lecture on Christian Science at the Opera house on Thursday evening, October 1.

Miss Sallie Dorsey of Stevens Point has been engaged by Prof. Hayward as one of the instructors in the Grand Rapids Business College.

A young Iowa doctor has discovered that the ankle is placed between the foot and knee to keep the calf away from the corn.—Ideal Power.

Prof. Boynton and Dr. Wagner who have been making this city their headquarters the past summer, departed on Monday for Chicago.

Charles Holliday returned on Friday from Chicago where he had been for several days purchasing for the fall and winter trade for the Johnson & Hill Co.

Miss Blanche Christenson of Neokoma, was a guest at the Chas. Waterman home on Monday while on her way to Appleton to attend Lawrence University.

Mr. and Mrs. Archie Muir of Park Falls and Mr. and Mrs. George Muir of March Rapids were here over Wednesday to attend the funeral of Mrs. Archie Muir.

John France returned on Saturday from a three weeks visit at his home in Norwich, Conn. Mr. France also visited in New York. He reports a most enjoyable time.

Mr. and Mrs. Robt. Morse were at Stevens Point on Friday where they spent a few hours at the fair. They went over in Mr. Morse's automobile and report that the fair was a good one.

Geo. Otto of Saukage was a visitor at the Chas. Bender home in Saukage over Sunday. Mr. Otto was accompanied home by his wife and children who have been visiting at the Bender home for several weeks.

George Compton of Oconto, who was called here to attend the funeral of his mother, returned to his home on Saturday accompanied by his father D. W. Compton, who will visit with him for some time.

Contractor Herman Abel returned on Saturday from Elm Lake where he has completed the erection of a large cranberry building for the Elm Lake Cranberry Co. The structure is 30x60 and is three stories high.

The new front is being placed in the Wood County drug store and when the work is completed it will present a very neat appearance. A single entrance in the center will take the place of the two entrances on the sides.

The two arches of the new bridge that the Consolidated people are building across to the island were completed last week and since then the masses have been at work on the approaches. The bridge already begins to present a handsome appearance.

Mr. and Mrs. A. P. Hirzy started on their trip home last Saturday, the 13th instant; and it is expected that they will arrive here some time during the latter part of the month, at the exact date cannot be given, as Mr. Hirzy expects to stop a short time in New York and Chicago to do some buying for his store.

Members of the Improvement association report that they have as yet been unable to make any settlement for the properties owned by Harvey Gee and Saul Preston, these being the only two pieces of property that have been unable to clear up. It is feared that the matter will be turned over to the city and the property condemned the interested parties being unable to agree on a price.

Mrs. F. W. Gearloch of Wausau visited in the city a few days last week.

Dr. J. A. Jackson of Randolph was a business visitor in the city on Tuesday.

John Nash of Neokoma was in the city on Saturday shaking hands with his numerous friends.

Miss Grace Nowatney is employed at the Lucht sisters millinery parlors during the fall rush.

Mr. and Mrs. John Boothke departed on Friday for a two weeks visit with relatives near Waukesha.

Bert McDonald left on Monday for Kinnelon where he will take up his studies in the college the coming season.

Andrew Kline departed on Tuesday for Pittsville where he will spend several days in the interest of the E. F. Lodge.

Mr. and Mrs. Glen Williams and children of Bruce were guests of Mr. and Mrs. George L. Williams during the past week.

Leo Ramsey left on Tuesday for Appleton; he left his intention to enter Lawrence University for the coming year.

Miss Luella Jackson is teaching in the kindergarten department of the Wausau schools having taken up her work there last week.

—LOST—A brown water spaniel, 4 months old, white spot on breast, answers to name of Nod. Return to Ann. John. Was side.

Dan Reichel expects to leave the latter part of the week for Plattville where he will specialize in mineralogy during the coming year.

Mrs. Ward Waterman returned to her home in Sturgeon Bay on Saturday after spending two weeks in the city visiting with relatives.

Misses Vida and Vella Reilly left on Thursday for Madison where they expect to spend a couple of weeks visiting with relatives and friends.

Haugh Goggins left last week for Milwaukee and intended to go from there to Ripon where he will enter college again for the ensuing year.

Mr. and Mrs. Hally Brooks of Green Lake, spent Sunday in the city, guests at the Gilkey home. They returned to Green Lake on Monday.

Ferdinand Phillips, of West Allis, a former resident of Randolph was in the city on Thursday transacting business while at Randolph looking after his farm.

Mrs. V. Moskan and daughter, Mrs. Jake Blaha, of Chicago returned to their home on Thursday after a two weeks visit at the home of Mr. and Mrs. Frank Mazur.

Rev. Richard Evans departed on Tuesday for Neenah where he will attend the Methodist conference of the Appleton district which will be in session the remainder of the week.

John Shonack, who lives near the furniture factory is nursing a badly bruised face and swollen foot which he secured by falling off his bicycle on Thursday while on his way to work at Birou.

Wm. Shirley of the town of Hansen was a pleasant caller at the Tribune office on Friday while in the city on business. Mr. Shirley reports that he has not raised a very good crop this year, the early part of the season being very wet, while the latter part has been excessively dry.

M. Weeks, who has had charge of the Wausau electric plant for a number of years past, has been engaged by the directors of the Electric and Water Company to take charge of the plant here. Mr. Weeks had many years experience in the electric business and should prove a good man with the plant here.

A new cement walk has been laid in front of the opera house and makes quite an improvement in the appearance of the structure. The interior work on the opera house has also been carried forward as rapidly as possible and a show will be held there on the 17th, altho the work will not be near complete at that time.

Mrs. Elizabeth Daly will commence the erection of a residence this week on property recently purchased from Mrs. Wm. Shea. The building will be 32x36 feet and will be modern in every respect, and the work of erection will be under the supervision of Herman Abel.

F. Beadle, the all-around handy man, expects to move in the rear future to the Miss M. A. Gordon building on Baker street, being cancelled to vacate his present quarters on the west side on account of the fact that the building will be torn down.

Walter Dickson has purchased the Catherine Townsend farm in the town of Randolph consisting of 120 acres. The property is located just across from the Catholic church and is very nicely situated. Mr. Dickson expects to move there with his family in the near future.

James Garrett of Vesper was a business visitor in the city on Saturday. Mr. Garrett, who is an enthusiastic Bryan man, says the boys at Vesper are organizing a Bryan club and that Bryan men out that way this fall are as plentiful as the pine stumps.

Almond Press—Frank Carey, traveling representative of the Railroad Packing Co. of Grand Rapids, was here Monday.—Earl Weeks, foreman of the printing department of the Grand Rapids Reporter, and who has been a Berlin visitor for a few days, returned home Sunday. While passing thru this village he met and shook hands with a number of friends.—R. A. Weeks, the well known Grand Rapids marble man, who furnished the Bedford stone for the new Postage County Bank building, was a business visitor in this village last week.—Mr. and Mrs. K. L. Thompson, of Grand Rapids, visited at the home of their son, D. E. Thompson, over Sunday.

Healthy kidneys filter the impurities from the blood, and unless they do this, good health is impossible. Foley's Kidney Cure makes sound kidneys and will positively cure all forms of kidney and bladder disease. It strengthens the whole system. Daily Drug & Jewelry Co. and Johnson & Hill Co.

### Council Proceedings.

Council Rooms, Sept. 9, 1908.

Council met in adjourned session. Mayor Pomainville presiding. Present: Aldermen A. D. Hill, Bamberg, Ellis, Briere, Pantier, Roenig, Lukasecki, Gilmeister, Jackson, Ris, G. M. Hill and Payne—12.

Absent, Alderman Steib, Sampson, Rosier and Lyon—4.

On motion, by unanimous vote the Clerk calling the roll, the Clerk was authorized to draw orders for the labor on the Eighth Street sewer for the month of September, the sewer being completed.

The bill of the Grand Rapids Plumbing and Heating Company was presented.

Motion made and seconded that the charge for work excavation in the Grand Rapids Plumbing and Heating Company's bill be allowed at \$1.75 per cubic yard instead of a \$2.25 per cu. yd. in full settlement of their claim under that item. Motion carried by unanimous vote, the Clerk calling the roll.

Motion made and seconded that the total bill of the Grand Rapids Plumbing and Heating Co. be allowed at \$719.53 in full settlement under their contract. Motion carried by unanimous vote the Clerk calling the roll.

Ordinance No. 131, providing for the opening and extending of a drain, ditch or canal and highway within the corporate limits of the City of Grand Rapids, was presented and motion made and seconded that the same be adopted. Motion lost by the following vote, the Clerk calling the roll. Ayes—Ellis, Roenig, Gilmeister, Jackson, G. M. Hill—5. Nays—A. D. Hill, Bamberg, Briere, Pantier, Lukasecki, Ris, G. M. Hill and Payne—7.

Alderman A. D. Hill moved that the vote on the proposed ordinance be reconsidered. Motion seconded and carried by the following vote, the Clerk calling the roll. Ayes—A. D. Hill, Bamberg, Ellis, Roenig, Jackson, G. M. Hill and Payne—7. Nays—Briere, Pantier, Lukasecki, Gilmeister and Ris—5.

Motion made and seconded that the ordinance be adopted and that the Mayor appoint a committee of three to report back to the Council upon the manner in which the work should be done. On roll call the vote was as follows: Ayes—A. D. Hill, Ellis, Roenig, Jackson, G. M. Hill and Payne—6. Nays—Bamberg, Briere, Pantier, Lukasecki, Gilmeister and Ris—6. The ordinance was adopted by the Mayor voting aye.

(Same may be seen in legal form.)

The Mayor appointed the following aldermen as a committee provided in the previous motion: Alderman Briere, Jackson and Gilmeister.

Moved and seconded that the Clerk be instructed to purchase a loose leaf ledger for the office of the Sept. 1st of the water-works. Motion carried.

Moved and seconded that when the Council adjourns it do adjourn until Monday, Sept. 23, 1908, at 8:00 p. m. Moved and seconded that the Council adjourn.

There was presented the resignation of F. Mulroy as a member of the Board of Review and, on motion, the resignation was accepted.

On motion, Geo. T. Rowland was elected as a member of the Board of Review to fill the vacancy caused by the resignation of F. Mulroy.

On motion, the sidewalk along the westerly side of Lots 1, 2, 3 and 4 of Block 16, of Neoves First and Second Addition to the City of Grand Rapids, was declared unsafe and defective and ordered removed. On motion, the Council adjourned.

C. E. Boles, Mayor.

### ORDINANCE NO. 131.

An ordinance to open, construct and extend a drain, ditch or canal and highway within the corporate limits of the city of Grand Rapids.

The Common Council of the City of Grand Rapids, Wood County Wisconsin, do ordain as follows:

SECTION 1. That a drain, ditch or canal be and hereby is opened, constructed and extended from such a point on the South line of Section number thirteen (13), Township number twenty-two (22) North, Range number five (5) East, as is intersected by Boles Creek, thence West to the West North and South eighth line of said Section number thirteen (13), thence North along said eighth line to the South East corner of the North West quarter (N. W. 1/4) of said Section number thirteen (13), to the South East corner of the North West quarter line of the north and south quarter line of said Section number thirteen (13), and on the north and south quarter line of said Section number Twelve (12), same town and range, to the center of said section twelve (12); thence East on the east and west quarter line of said Section Twelve (12) to the East section line of said section twelve (12); thence North on the range line between ranges number Five (5) and six (6), said Town, to the South East corner of the North East quarter (N. E. 1/4) of the North East quarter (N. E. 1/4) of Section number One (1), Township number Twenty-two (22) North, Range number Five (5) East; in Range number Five (5) East; in accordance with plan drawn by city engineer, now on file, and which said plan or profile is hereby incorporated as a part of this ordinance.

And that Boles Creek be altered, widened and straightened from where the same crosses the South Section line of said Section number thirteen (13) for such distance as may be necessary in order to carry off the water from said ditch or drain properly.

That said drain, ditch or canal be of the width of six feet at the bottom thereof, and shall be of the depth described in said plan or profile of said city engineer. That the strip of land along the entire route of said drain, ditch or canal the width of 99 feet be and the same is dedicated to the use and purposes herein set forth, all of which strip of land, said city has acquired from the respective owners thereof by quit claim deeds.

SECTION 2. This ordinance shall take effect and be in force from after its passage and publication.

Frank Pomainville, Mayor.

Passed by an affirmative vote of the Common Council of said city of Grand Rapids, this 9th day of September, A. D. 1908.

Attest:

C. E. Boles, City Clerk.

Age at last birthday.....  
P. O. address.....  
R. F. D. number.....

We have reserved a number for the Country Schools and will be glad to have either the children or their parents call for them. If you cannot come now, write us and we will save you one.

Fallacious Finance.

If you had \$250,425,623 to your credit in the banks, and you had notes or bonds coming due, amounting to \$42,945,469 on August 1, drawing three per cent. interest, would you pay what you owe, or allow the notes to run for ten years longer? It would seem to be a plain business proposition to pay the notes and thus save two per cent. interest. The above statement of the amount of money on deposit in the banks and the bonds due on August 1, is the exact condition of the United States treasury on July 17, but it is stated that Secretary Cortelyou intends to allow the \$63,000,000 of bonds to run and still draw three per cent. interest instead of paying them.

Those outstanding bonds were issued on August 1, 1898, on the three per cent. 1900 basis, that is the government can redeem the bonds on the expiration of ten years, or can allow them to run ten years longer. Those outstanding bonds can also be refunded.

BY DRUMB & SUTOR.  
GRAND RAPIDS, WISCONSIN.

Santo Domingo has sold her navy for \$1,750, and is now defenseless.

Meanwhile the man in the moon is still looking for the coming flying machine.

Wilbur Wright has spoiled the feast of those funny Frenchmen who did not believe he could fly.

A Chicago woman shot at a burglar and hit her baby. Next time she'll know which is aim at.

Baltimore is going to abolish some 50 grade crossings at an expense of \$7,000,000. Progressive Baltimore!

In view of the fact that Chicago is wasting \$3,000,000,000 gallons of water a year, it is fortunate that the lake is handy by.

A New Jersey court decides that it is not unlawful for a man to swear at his wife. Perhaps not, but many find it dangerous.

The small boy sometimes gets tanned when his disfigurement goes swimming, and sometimes again when he gets home.

Chicago professors still lead in research work. One has now initiated the dove for not being gentle, and says he can prove it.

Germany's financial enthusiasm over Count Zeppelin is evidence that the value of his airship as an instrument of war is fully recognized.

That couple who were married in the front of one of the amusement parks must have thought marriage was all the comic papers pictured it.

The American woman who has been awarded \$1,000,000 by a decision of the French court can now choose her count or prince, unless she prefers a duke.

A man cannot make a balloon ascension in Austria without the written consent of his wife. It's getting so a man can't even get off the earth on his own responsibility.

The agricultural department has discovered that rats are afflicted with pathogenic bacteria, hence the reason for their death. This is even worse than arterio-sclerosis.

Down in Rio they figure that by 1915 there will not be any stored up surplus of visible supply of coffee in the world; but what can they tell about the cherry crop?

As a matter of fact, Christopher Columbus or some other worthy person should be standing on nearly every street corner offering generously a drink of water these days.

If the Sultan of Turkey heeds the warning notice that he must disband his army and live forthwith in European fashion, with one wife, the cost of living for him is going to be very much reduced.

A Montana brakeman was fined \$800 for getting a pass for his wife and then giving it to another woman. The fine probably didn't bother him nearly so much as what his wife had to do when she heard about it.

In the advance notice Edison's new flying machine is almost as wonderful as his late storage battery which people used to sit up nights to wait for that they might miss its first triumphant progress past a given point.

It is said that there is enough coal in Alaska to put off the fuel famine from the exhaustion of coal which had been predicted at the end of the present century. This news will be a great relief to present coal consumers who have been alarmed over what they had to expect in about 90 years.

The New York board of education is struggling with a matrimonial epidemic, which is devastating the schools. And to add to the horrors of the situation, Cupid, in defiance of the new fashion of fault-finding, is touching the conjugation of the verb "to love" in the good old-fashioned way.

The double veil has made its appearance in fashionable society, and men are complaining that they cannot recognize their women friends. It is something of an odd coincidence that just as the women of sanctified Turkey are rejoicing in flinging off their concealing veils as disadvantages the highly civilized women of the west are adopting them.

What chance has a young man to rise in the employment of a large corporation? Is a question frequently asked. Of course it depends largely on the young man; but according to a statement recently sent out by the Pennsylvania Railroad Company, 67 of the 85 principal officers of the company started at the bottom and worked their way up. This is worthy many volumes of theorizing on the subject.

Queer things are alleged to get into sausages, and perhaps the experience of a lady in Wakefield, Mass., should not cause surprise. She was eating sausage when she bit a tack and broke a front tooth. The tack, the lady went into court, and a jury has just awarded her \$2,000 damages. That is the New England spirit, says the Boston Herald. The Bostonians of pre-revolutionary days made strenuous resistance to the tax on tea, and this descendant of resolute ancestors consistently draws the line at tacks in sausages.

If the bakers will make good bread out of pure flour, and educate the people to buy it, "the great destroyer of domestic happiness, dyspepsia, will be removed, and we shall hear no more of the divorce problem." So Dr. Wiley, of the government expert, told the American Dietetic Association the other day. The hard done by heavy bread, soggy pie crust and greasy cakes is so great that no one has dared to estimate it. That young woman who wishes to make the world better may begin well by learning how to cook digestible meals.

It appears to be a neck-and-neck race between the aeroplane and the dirigible balloon to see which will get there first. Fortunately the science of flying has advanced so far that it is not the neck of the operator we are talking about.

Laramie, Wyo., has a blacksmith who writes poetry, says the Denver Post. We've heard of the musical blacksmith before. Also, we now know how a good deal of our magazine verse is hammered out. Not knocking anybody.

# FLAY JUDGE LANDIS

LAWYERS FOR STANDARD OIL FILE THEIR ANSWER.

DECLARE FINE EXCESSIVE

Jurist in Charged with Yielding to Outside Influences and the Prosecution is Called "Malicious."

Chicago—Judge Keneasaw Landis, who fined the Standard Oil Company \$20,000, is charged with having permitted outside influences to govern his decision by the attorneys for the company in their answer to the application for a rehearing filed in the United States court of appeals.

The answer to the judgment of that court on an "unlawful fine" and says that the court was "governed by evidence and considerations which were not proper to influence a judicial magistrate."

District Attorney Sims, who conducted the prosecution, was referred to as a "zealous prosecutor."

The answer to the government's appeal for rehearing is submitted by Attorneys John S. Miller, Moritz Rosenthal and Alfred D. Eddy, counsel for the oil company, and cites numerous reasons why Judge Grosscup and his associates in the court of appeals should not grant the government's petition.

The principal argument presented is in regard to excessive fines, and is

# BRAINS THREE WITH AN AX

BLOODY CRIME OF CRAZED MAN AT WILMINGTON.

Attacks Wife, Adopted Daughter and Her Husband, While They Are Asleep—Duel at Los Angeles.

Wilmington, Del. — During a fit of temporary insanity Pearson Talley, 60 years old, of this city, early Wednesday attacked his wife, his adopted daughter, Edith Johnson, and her husband, Andrew Johnson, and inflicted such serious wounds with a broad ax that the victims are not expected to live. Talley is under arrest and says he cannot account for his murderous deed.

Talley attacked his wife as she lay in bed and fractured her skull with the ax. He then went to the bedroom of his adopted daughter and struck her with the weapon as she slept, laying open her skull. Her husband was awakened just as the infuriated man was about to bring the weapon down upon him. He grappled with his father-in-law, warding off a blow from the ax. Talley, however, struck at him again and inflicted a wound on the back of the head. They wrestled all over the bedroom for some time, but Johnson could not get the ax away from Talley, and when John Farmer, living next door, who had been attracted by the noise, arrived on the scene, Johnson was nearly exhausted from loss of blood.

After he had been subdued the desolating blow was struck by Talley. The ax was thrown at the head of the man, and it struck him in the forehead, fracturing his skull. The ax was then thrown at the head of the woman, and it struck her in the forehead, fracturing her skull. The ax was then thrown at the head of the man, and it struck him in the forehead, fracturing his skull.

The ax was then thrown at the head of the woman, and it struck her in the forehead, fracturing her skull. The ax was then thrown at the head of the man, and it struck him in the forehead, fracturing his skull. The ax was then thrown at the head of the woman, and it struck her in the forehead, fracturing her skull.

# PERSPECTIVE VIEW OF WRIGHT AEROPLANE.

The aeroplane with which Orville Wright at Fort Myer remained in the air for 62 minutes and 15 seconds, or over twice the time of Delagrange's record, is a duplicate of the one which Wilbur Wright is operating in France. The machine is sustained in the air by the reactions which result from thin surfaces or wings moved horizontally, almost edgewise, through the air at a small angle of incidence, either by the application of mechanical power or by the force of gravity. The wings (1 and 2) are made of cloth stretched on a light frame of wood and wire. They are connected with each other through ball and socket joints by the upright standards (3), and can both flex and twist. The front horizontal rudder (5) is almost free from pressure in action. When the rear edge is raised or lowered the course of the machine is kept upward or downward at the will of the operator, who lies prone on the lower wing surface. He grasps the nearer rudder (9), which controls the rudder. The tail or rear rudder (10) controls the motion of the machine to right or left. The rudders are moved by tiller ropes. The hips of the operator rest on the movable cradle (11), and thereby he imparts motion to the wings.

**A Generous Gift.**  
Generous and philanthropic to the end, Col. William F. Vilas, former United States senator and cabinet official, made a posthumous bequest of nearly all his estate to the University of Wisconsin.  
The estate, now said to be worth \$3,000,000 to \$4,000,000, is to be held in trust for the use of the widow during her life. The income now is \$160,000 a year. Upon her death the whole property is to be turned over to the university, subject only to the charge of \$20,000 a year to his daughter, Mrs. L. M. Hanks, during her life, and some minor charges.  
After the property was turned over to the university only half of net income is to be expended until principal with increment shall reach \$50,000,000.  
Then only one-fourth of net income will be paid aside and added to the principal, this to continue until the property reaches \$20,000,000.  
Then the entire income is to be paid to the university. There is no doubt that the legislature will enact the necessary statute of acceptance as provided in the will.  
The will provides for a Henry Vilas chamber, to be a general meeting place, provided with reading rooms, lecture halls, baths and other accessories.  
It is also provided that a large number of scholarships be established and ten professorships, each to have a salary of not less than \$5,000 nor more than \$10,000 a year. These professors are to retire on a pension of not over \$2,500 each.  
There will be ten scholarships for undergraduates at \$400 a year, and ten fellowships at \$300 each. These may be adjusted so as to provide not more than five traveling fellowships at \$1,500 a year. Then too, research may offer cash prizes.  
For at least one-fifth of these scholarships and fellowships the recipients shall prefer worthy and qualified candidates of negro blood, if any present themselves.  
After these things have been accomplished, there may be established more professorships for the advancement of knowledge or instructional work.  
All appointments of professors, scholars and fellows are to be wholly in the hands of the regents.

**Chord of Thanks.**  
We wish to thank those kind neighbors and friends, and especially the members of the C. A. R. and the W. O. R. for their kindness and assistance during the sickness and after the death of our wife and mother.  
D. W. Compton and family.

**Notice of Removal.**  
—Frank Matulewicz, who has been conducting a shoe shop in the last building, will move into the building next to the Dents saloon in the near future, at 105 First Ave. South.

**Notice.**  
—There will be no services at the M. E. church next Sunday as the pastor is attending Conference. The usual services will be held the following Sunday.

**BIRTHS.**  
A daughter to Mr. and Mrs. Alfred Dougherty on Wednesday.

**The New Pure Food and Drug Law.**  
We are pleased to announce that Foley's Kidney and Tonic, for coughs, colds and lung troubles is not affected by the National Pure Food and Drug law as it contains no opiates or other harmful drugs, and we recommend it as a safe remedy for children and adults. Johnson & Hill Co. and Daly Drug & Jewelry Co.

—Galvanic Soap saves the clothes by not making it necessary to wear them out on the washboard. The soap being absolutely pure, does not leave any waste matter in the fabric to rot it. It rinses out easily and completely.  
One of the worst features of kidney trouble is that it is an insidious disease and before the victim realizes his danger he may have a fatal malady. Take Foley's Kidney Cure at the first sign of trouble as it cures kidney troubles and prevents kidney disease and diabetes. Johnson & Hill Co. and Daly Drug & Jewelry Co.
